PROFESSIONAL SUMMARY

AI-native full-stack engineer with 5+ years of experience building and shipping websites, e-commerce stores, and web platforms for teams in New Zealand, Japan, France, and the United States. Works AI-first every day with Claude Code, Cursor, GitHub Copilot, ChatGPT, and Gemini, with human review on every change. At Plato Creative, builds AI solutions for a web agency: Claude Code agent skills that automate CMS maintenance and site builds, Model Context Protocol (MCP) integrations for Craft CMS, Storyblok, and Statamic, and AI-powered workflows for content teams. Full-stack depth in PHP, JavaScript, TypeScript, React, Next.js, Vue.js, and headless CMS.

TECHNICAL SKILLS

AI & Agentic Engineering: Agentic AI, AI Orchestration, AI Agents, Agentic Coding, Claude Code Agent Skills, Model Context Protocol (MCP), MCP Integrations, Prompt Engineering, Context Engineering (CLAUDE.md), Human-in-the-Loop Guardrails, AI-Powered Workflow Automation, AI-Assisted Development, Generative AI, Large Language Models (LLMs)

AI Tools & Models: Claude (Anthropic), Claude Code, Cursor, GitHub Copilot, ChatGPT (OpenAI), Google Gemini

Languages: JavaScript (ES6+), TypeScript, PHP, SQL, HTML5, CSS3, Twig

Front End: React, Next.js, Vue.js, Angular, Astro, Tailwind CSS, Sass/SCSS, Bootstrap, jQuery, XState

Back End & APIs: Node.js, Laravel, Livewire, CakePHP, REST APIs, GraphQL

CMS & E-commerce: Craft CMS, Statamic, Storyblok, SilverStripe, WordPress, Elementor, Bricks Builder, Shopify, Headless CMS

Databases: MySQL, PostgreSQL, MongoDB, Redis

DevOps & Hosting: Git, GitHub, GitLab, Docker, DDEV, Vercel, Netlify, SiteHost, WP Engine, Kinsta, Cloudflare

Practices & Tools: Website Maintenance and Security Updates, Technical SEO, Core Web Vitals, Cross-Browser Testing (BrowserStack), Code Review, Agile, CMS Training, Jira, Slack, Figma, Postman, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer (AI Tooling & Automation)

Plato Creative | New Zealand (Remote) | Jan 2026 - Present

- Build and ship client websites, e-commerce features, and web products with an AI-native, agentic workflow in Claude Code and Cursor, with code review and QA on every change.
- Built a library of Claude Code agent skills that automate the web team's recurring work: Craft CMS and SilverStripe maintenance passes (dependency updates, security audits), DDEV environment setup, and conversion of HTML prototypes into Astro, Tailwind CSS v4, and Storyblok components.
- Connected AI agents to client CMS platforms through the Model Context Protocol (MCP), including production-hardened Craft CMS MCP installs with multi-site GraphQL, and Storyblok and Statamic MCP workspaces that let non-technical editors manage content through Claude.
- Designed human-in-the-loop guardrails for these AI workflows: production-safe defaults, confirmation at each decision point, CLAUDE.md context files, and a review step before any commit.
- Built, updated, and maintained 40+ client websites across Craft CMS (Twig), SilverStripe, WordPress, Statamic, and Storyblok, with front-end and e-commerce features in React, Vue.js, Next.js, Astro, and Tailwind CSS.
- Run dependency upgrades, patches, and security audits across client sites hosted on SiteHost, deliver CMS training to clients, and work daily with client services, marketing, SEO, and design teams.

Software Developer

Forty Degrees Celsius Inc. (NativeCamp) | Feb 2024 - Jan 2026

- Developed new features and critical fixes for NativeCamp, one of Asia's largest online English learning platforms, using PHP (CakePHP), SQL, JavaScript, Angular, and Vue.js.
- Used AI coding assistants daily (GitHub Copilot, ChatGPT, Gemini) to debug issues, generate code, and understand unfamiliar parts of a large production codebase.
- Served on the dedicated bug team, identifying and resolving critical bugs across the whole system from support and development tickets.
- Worked in daily stand-ups with a cross-functional team and reported progress to Japanese senior engineers.

Freelance Full-Stack Developer

Self-employed | Remote | 2024 - 2025

- Built 50+ websites for US small businesses, mostly home-service companies, on WordPress (Elementor, Bricks Builder) and Duda, with service-area pages, quote and booking flows, and mobile-friendly layouts.
- Set up hosting on WP Engine and Kinsta with Cloudflare, WP Rocket caching, and staging environments for safe releases.
- Rebuilt and migrated the Chitchat Confessions community platform to Next.js, React, TypeScript, and Tailwind CSS, launching with no downtime for users.
- Used AI-assisted development (GitHub Copilot, ChatGPT, Gemini) to deliver a high volume of client sites on short turnarounds.

Software Engineer

Korlanda Corp. | Dec 2020 - May 2023

- Developed and optimized front-end features for WordPress e-commerce sites for French jewelry brands, including Nature Bijoux and Franck Herval, using JavaScript, jQuery, PHP, SQL, HTML, CSS, and Bootstrap.
- Refactored existing code to improve page performance, maintainability, and user experience.
- Resolved bugs and shipped fixes from client and internal support tickets.
- Collaborated with senior developers based in France on tasks, solutions, and technical improvements.

Software Engineer Intern

DNA Micro | Feb 2023 - Apr 2023

- Contributed to production client projects built with React, JavaScript, XState, MongoDB, Tailwind CSS, and Axios, using GitLab for version control.
- Managed application state with XState state machines and connected front ends to REST APIs with Axios.
- Took part in code reviews, team discussions, and technical problem-solving with the engineering team.

PROJECTS

harriekevingallo.com: Portfolio and Gals Lab Control Panel

Next.js 15, React 19, TypeScript, Tailwind CSS v4, Vercel | 2026

- Built AI-first with Claude Code: a one-page portfolio and a Statamic-style control panel that catalogs 100+ projects, services, and tools, with command palette search, light and dark themes, JSON-LD structured data, a sitemap, and a redirect map.

Trackfunds: Personal Investment Tracker

Next.js, TypeScript, Tailwind CSS, PostgreSQL | 2024

- Designed and built an investment tracking app from first wireframe to working product, covering interface design, data modeling, and charts that summarize portfolio performance.

EDUCATION

Bachelor of Science in Information Technology

Southwestern University PHINMA | Cebu City, Philippines | 2019 - 2023
